PROFESSIONAL SUMMARY

Frontend Developer with **2+ years** building production-grade, responsive interfaces across e-commerce, education, and Shopify platforms. Specialized in **React.js**, **Next.js**, and **JavaScript (ES6+)** with **TypeScript** — translating Figma into pixel-perfect, cross-browser UIs, building **reusable component architecture**, and optimizing animation-heavy pages (**GSAP**, **Framer Motion**) to load noticeably faster and run smoothly across devices.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, Next.js, Tailwind CSS, GSAP, Framer Motion, Three.js

Shopify: Shopify Theme Development, Liquid, Theme Customization, Online Store

Tools & Version Control: Git, GitHub

PROFESSIONAL EXPERIENCE

Frontend Developer — Indieflluence

Aug 2024 – Present

Kurukshetra, Haryana

- Grew into owning complete frontend builds — from reusable component systems to full production storefronts — across multiple concurrent client projects.
- Redesigned outdated, cluttered interfaces into modern, user-friendly experiences that increased engagement and drove **higher sales for e-commerce and educational clients**.
- Improved site speed and overall user experience across projects while mentoring junior developers and maintaining clean, consistent code to keep delivery on schedule.
- Collaborated closely with designers and backend developers to turn requirements and Figma files into working, maintainable interfaces on tight delivery timelines.
- Took ownership of quality end to end — keeping every build consistent and bug-free across browsers and screen sizes before client handoff.
- Translated complex client requirements into simple, intuitive user flows, making it easier for visitors to move through each site.

PROJECTS

Meiosis Publication

2026 – Present · Ongoing Enhancements

Shopify · Liquid · JavaScript · HTML · CSS

- Rebuilt the storefront UI/UX from scratch for an educational platform serving **2,000+ daily visitors**, replacing a cluttered legacy design.
- Built reusable, filterable product sections and a fully mobile-first, responsive interface across exam and product categories.
- Developed the frontend for a reviews system (**4.8/5 across 10,000+ reviews**), lead popups, carousels, and a cart drawer that streamlined browsing to checkout.
- Designed category-wise landing sections and rotating hero banners tailored to each exam and product line (NEET, JEE, CBSE, MeioKids).
- Built a cart-page WhatsApp share button that lets shoppers send their full cart to a friend or family member, who can open it and complete the purchase for them.

Rabbit Autocare

2025 – Present · Maintenance & Updates

Next.js · Tailwind CSS · JavaScript · GSAP

- Built the complete frontend for a premium car-care store, delivering a smooth, highly animated, Gen Z-oriented storefront.
- Engineered scroll-triggered animations and a scroll-aware navigation bar for an interactive, modern browsing experience.
- Optimized images and asset loading, raising the site's **Lighthouse performance score from 43 to 73**.
- Built reusable, component-driven product, kit, and collection pages, including an interactive stacked-card product showcase.
- Fetches and renders product, coupon, and discount data to keep the storefront UI in sync with the latest catalog and offers.

EDUCATION

Bachelor of Computer Applications (BCA)

2021 – 2024

Kurukshetra University — JMIT (Seth Jai Parkash Mukand Lal Institute of Engineering and Technology)
